WORK EXPERIENCE

PERSONAL PROJECTS

• Next-Js Users Info

Fetch users to home page, and on the click of a button it will take us to the details of the individual user

Technologies used: Next js, Tailwind Css & json-placeholder Api

Deploy Link: https://github.com/UsamabSadiq/Next-Js_Users-Info

• Food App Project

This project works on a custom data coming from backend server, I also add filtration according to meal selection by the user

Technologies used: React Js, TailwindCSS, Express Js

• News App Project

News App Project I utilized news api for this project and Next-Js and Tailwind Css for this project

Technologies used: Next Js, TailwindCSS

Deploy Link: https://github.com/UsamabSadiq/News_App

• Architect Landing Page

I designed a static UI, related to architectural projects and design.

Technologies used: Next Js, TailwindCSS

Deploy Link: <https://architect-nextjs.vercel.app/>

• Ecommerce Project (in progress)

This is going to be complete ecommerce site, currently I have done only frontend only

Technologies used: Next Js, TailwindCSS and Strapi

Deploy Link: <https://nextjs-ecommerc-frontend.vercel.app/>
